

THE
MARRIAGE
OF
DRAGON

Once upon a time, in a Faraway Kingdom,
a dragon kidnapped a young princess and imprisoned
her in his castle.

A brave knight set forth on a journey to rescue the
beautiful maiden from the clutches of the beast..

A cliché story?

It would be, if we were to overlook the details.

Meet Andria,
the Dragon Queen,
and she indeed kidnapped the princess.

To marry off her wayward
son, Prince Ktorhu,
and finally get him to move
out of his mom's castle!

Well... or at least
tidy up his room.

Sowever, neither Prince Ktorhu nor Princess Marianna are eager to tie the knot.

And the brave knight
Sir Darius is already on
his way,
determined to rescue
the princess.

You are about to choose your hero and embark on a challenging journey from the Kingdom of Dragons to the Kingdom of Humans, solving puzzles along the way and battling monsters.

Choose your path wisely, but remember that any road can lead you to success.

You see a small, adorable rabbit in armor with a tiny sword. It has lovely, bloodshot eyes, and drool seems to be dripping from its mouth. What will you do?

Sir Hopsalot
Devotee of Winged Wisdom

SPEAK

Hello, little one!
Why are you
here all alone?

ATTACK

Aattack this
unholy creature!

HIDE

Hide and wait
until it leaves

Marianna
The Princess

It's up to you whether your hero finds love,
and only you decide to whom
you give your heart,
for there is no wrong love.

"The Marriage of Dragon" is a role-playing game in the genre of a text-based quest and visual novel set in a fantasy world full of magic and adventures, suitable for players of all ages and levels.

Players will choose their character and, depending on that choice, embark on an adventure as a princess kidnapped by the dragon queen, a dragon getting to know its abducted bride, or a knight setting out to rescue the princess.

The main characters eventually meet and continue their journey from the dragon's castle to the royal palace together.

Each character has its strengths and weaknesses, which players need to consider in battles or peaceful negotiations, finding a way out of traps, or navigating unfamiliar places.

- ◆ Strength
- ◆ Athletics
- ◆ Survival

- ◆ Speed
- ◆ Agility
- ◆ Accuracy

- ◆ Magic
- ◆ Intelligence
- ◆ Eloquence

Relationships between the characters play a crucial role in the game. Players can either fall out with all team members and continue the journey alone (which is likely to end sadly) or build strong friendships and, with some characters, even develop a romantic relationship.

Along the heroes' path, they will encounter amazing places, interesting stories, and creatures of various levels of friendliness.

The main character's task is to reach the human kingdom and enter the palace, and the end of the game will depend on the decisions made throughout the journey.

Unique Game Features:

- ◆ Choice of the main character: princess, dragon, or knight for storyline progression. This allows the player to see the story from different perspectives and delve deeper into the game world.
- ◆ Three different versions of gameplay: navigate through the portal system, explore the catacombs, or venture into the enchanted forest. This provides the opportunity to play the game three times in different locations, utilizing different skills.
- ◆ Various relationships with Characters: the hero can choose friends or a romantic partner regardless of gender and biological species or remain a lone adventurer.
- ◆ Colorful graphics and a unique style.
- ◆ Light narrative with elements of humor, suitable for both solo play and family evenings or friendly gatherings.

The journey begins!

THE MARRIAGE OF DRAGON.

What kind of hero will you become?

Who are we?

SilverCord-VR is a small indie game development and VR technology studio.

We are the creators of a unique VR treadmill, the world's first, allowing users to swim and fly in virtual reality.

With extensive experience in developing software products across various fields, we also have two proprietary games available on the Steam platform.

We excel in the technologies of game development and understand the journey from a game idea to its placement in the store.
